

# EUROPEAN COTTAGE

- 1 Give the paper to a sheet of thin card-board
- 2 You may find it easier to paint the building at this stage - show the painting guide below
- 3 Carefully cut out the seven pieces
- 4 With a sharp knife or the sharp end of a scissors blade, carefully score along all lines which are to be folded.
- 5 Fold the pieces as marked - all folds are folds back - not forward. The building will probably fit into shape if you remember this.

- 6 Reasonably glue the basic oblong wall-structure.
- 7 Reasonably glue, using self-tape to hold the parts in shape on the inside, the roof structure. Glue on top of walls.
- 8 Reasonably glue the chimney & corner. The chimney is placed in the hole cut in the roof - the door can be put anywhere.
- 9 Add a block of scrap wood in a doorway, maybe some bits of sash, with coloured card cut as window pane, glue onto a piece of heavy card, landscape with flock & fiction paper - and they are ready!

**COLOURS:** Walls - dirty white or cream  
 Redbrick & brown timber where they show  
 Roof - red, brown or dark grey  
 Door & window surrounds - dark green  
 Shutters - red or white
